

SOLAR PLAN SUBMITTAL QUESTIONNAIRE

- I understand that all items below must be checked (agreed to) or the process will not continue.
- I understand that electronic solar plan submittals must be submitted so that only the sheets pertaining to the specific plan image type are uploaded to that image type (Specifications, for instance, would not have site plan, one line etc.).
- I understand that in the event that a specific file or plan image type is missing information or contains information needing revision that the resubmittal (re uploaded file) must contain all information (sheets); not only the missing or revised sheets.
- I understand that module grounding specification (Method of grounding) must originate from one of two sources:
- 1. The module manufacturer (Information from the rack manufacturer is not acceptable).*
 - 2. A NRTL (Nationally Recognized Testing Laboratory) listed combination of specific module with specific grounding method.*
